

# MPPT NEWSLETTER JULY 2026

MOUNT PLEASANT  
PEDIATRIC THERAPY, LLC

## HIGHWAY 17 SO FAR

17

It's been a whole month since our new clinic space at Highway 17 opened its doors to the public and so far, it's been going great! Both clinics have been a lot calmer, as this allows for smoother transitions and less distractions for our kiddos and their therapists.

We're especially excited about the addition of our monkey bars and zipline, which have quickly become favorite therapy tools. It adds a new and fun way to work on strengthening muscles while also regulating and building confidence in our friends.

Each room in Highway 17 is equipped with toys and games, which is a little different than Johnnie Dodds' toy closet. You can expect Highway 17 to provide the same quality of care as Johnnie Dodds, as we are loving how both clinics are running smoothly and effectively!

As with any new space, we're continuing to make adjustments and fine-tune the details to ensure it best serves our families. A special thank you goes to Mr. Frank, who has been working tirelessly behind the scenes to bring this vision to life and continually improve our clinic. We would also like to thank you as well for working with us to accommodate the schedule changes, as this is the future of Mount Pleasant Pediatric Therapy!

# STUDENT SPOTLIGHTS

This summer, MPPT welcomed 4 talented graduate students to our clinic. These students are gaining hands-on experience alongside our experienced therapists, expanding their skills and putting their knowledge to use in a clinical setting as they complete their clinical hours. Meet our students:

## Megan

SLP graduate student from MUSC

## Alyssa

OT graduate student from Messiah University

## Olivia

SLP graduate student from MUSC

## Erin

SLP graduate student from MUSC

We are proud to support the next generation of therapy professionals and look forward to being a part of their educational journey. It's been great seeing these dedicated graduate students continue to grow and refine their learned skills. Our graduate students have been a valued part of our team, and we are proud to have played a role in their clinical education.

We look forward to supporting them throughout their clinical experience and in their futures as professional Speech and Occupational Therapists!

# SURFER'S HEALING 2026

Its almost that time of year again to announce one of our favorite community events, **Surfers Healing Folly!** This is a full day event that we will be taking a day out of our regularly scheduled clinic hours to spend the day at Folly Beach to cheer on our friends partaking and support such an awesome organization. Surfer's Healing Folly will take place on:

**Wednesday August 19<sup>th</sup> @ Folly Beach Pier**

**\*Both clinics will be closed that day\***

Surfer's Healing gives children with autism the opportunity to experience the joy and freedom of surfing in a safe, supportive environment, thanks to dedicated volunteers and experienced surf instructors. What began as a single beach event has grown into a nationwide program that provides free surfing experiences for thousands of children with autism and their families each year! More than just a day at the beach, Surfers Healing gives families the opportunity to connect with others, celebrate their children, and create lasting memories.

[www.surfershealing.org](http://www.surfershealing.org)

We hope that those kiddos who signed up and have a spot will let us know when your child is surfing- we would love to cheer them on! For those who did not get a spot and were put on the waitlist, please know that there will be a good amount of cancelations before the event, so keep an eye out. We hope to see many of you there, as it will be an awesome day at the beach!
